ABOUT ME

Final-year B.Tech Computer Science student with strong backend development skills in Java and Spring Boot. Experienced in building microservices, containerizing apps with Docker & Kubernetes, and deploying on AWS. Passionate about cloud-native architecture and scalable backend systems. Seeking a backend/cloud engineering role in a fast-paced development team.

SKILLS

- Languages : Java, C, JavaScript
- Frameworks/Libraries : Node.js, Spring Boot, Bootstrap, React
- Web Technologies : HTML, CSS
- Databases : MySQL, MongoDB
- Tools & DevOps : Git, npm, Yarn, VS Code, Docker, AWS, Kubernetes
- Architecture : Microservices , Rest APIs

INTERNSHIP

Organization: Cognizant

Position: Intern

Duration: February 14, 2025 – June 9, 2025

- Designed RESTful microservices using Spring Boot and Java.
- Containerized applications using Docker; deployed to AWS EC2 via Kubernetes.
- Developed a credit card system in C using POSIX threads and shared memory.
- Participated in interim and final evaluations; received positive feedback.
- Tech Stack: Java, Spring Boot, Docker, Kubernetes, AWS, C, Linux, Git.

PROJECTS

Ecommerce Backend with Spring Boot & JWT

June 2025 | Backend Application

GitHub: <https://github.com/abhidigiworld/Ecommerce>

- Built a secure ecommerce backend using Spring Boot, JWT authentication, and REST APIs.
- Managed 3 core modules: users, products, and orders with role-based access.
- Tested with 1000+ API requests using Postman and covered core logic with unit testing.
- Focused on modular design, exception handling, and clean API structure.

Sakshi Enterprise Billing System

May 2024 | Web Application

GitHub: <https://github.com/abhidigiworld/bills>

- Built a billing system using React, Node.js, and MongoDB for Sakshi Enterprise.
- Reduced manual data entry time by 60%, improving overall business efficiency.
- Handled 100+ invoices and customer entries with secure CRUD operations.
- Designed a user-friendly interface and ensured secure login and data handling.

Photographer Portfolio Website

Nov 2023 | Web Application

GitHub: <https://github.com/abhidigiworld/Amanphotography>

- Created a simple one-page portfolio website using Angular and TypeScript.
- Designed a responsive layout to work smoothly on mobile and desktop devices.
- Helped a local photographer showcase their work and improve their online presence.

Docket – Study Planner App

Apr 2023 | Java Application

GitHub: <https://github.com/abhidigiworld/Docket>

- Developed a Java-based application to help students manage study schedules.
- Created personalized plans based on syllabus, exam dates, and goals.
- Boosted study productivity by 30% based on early user feedback.
- Implemented features like reminders, subject tracking, and priority tasks.

CERTIFICATIONS

- Earned Docker certification from Udemy May, 2025
- Earned Node.js framework certification from Board Infinity May 2024
- Received React frontend certification from IBM March 2024
- Obtained JavaScript certification from Board Infinity July 2023

ACHIEVEMENTS

- Secured 3-star rating in JAVA on HackerRank.
 - Attained 5-star rating in C++ on HackerRank.
 - Won third position in Science Exhibition at the state level & participated at the national level.
- January 2023

March 2021

February 2018

EDUCATION

Lovely Professional University Bachelor of Technology - Computer Science and Engineering, CGPA 7.68	Punjab, India August 21- Present
USPC Jain Public School Intermediate, Percentage: 64%	Ludhiana, Punjab March 2020
Darshan Academy Matriculation, CGPA 7.6	Ludhiana, Punjab March 2016
